<b>TOTAL BIRDS</b>	<b>94</b>	<b>37</b>
<b>SPECIES TOTAL</b>	<b>24</b>	<b>10</b>

The Monitoring Avian Productivity and Survivorship Program at Highlands Biological Station completed a fifth season of monitoring, banding 94 new birds of 24 species. Recaptured birds totaled 37 birds of 10 species, including 5 birds that had originally been banded in the first year of the study back in 2020! (More detailed look at results in the Winter newsletter)
